Linotype and Machinery, Limited.—*Directors:* Sir J. Lawrence (Chairman and a Managing Director), A. H. Walker (Deputy-Chairman and a Managing Director), P. T. Dodge (a Managing Director), N. Dodge, C. Eves, A. M. Haines, W. H. Lock (Assistant Manager), A. H. Pollen and F. J. Warburton. *Secretary:* E. L. Booty. *Office:* 188-9, Fleet Street, E.C.—The company was registered August 11, 1903, to amalgamate the Linotype Company, Limited, and the Machinery Trust, Limited. The former was registered December 7, 1896, to acquire the undertaking and business of a company of the same name, registered July 29, 1889, which owned the patent rights for the United Kingdom for a type-composing machine known as the Linotype; and the Machinery Trust, Limited, was registered September 8, 1893, "for the purpose of enabling newspaper proprietors and printers generally to acquire machinery for their business on deferred terms, or on the rental system commonly known as hire-purchase." Late in 1908 arrangements were made for effecting a union of interests between Linotype and Machinery, Limited, and the Mergenthaler Linotype Company of New York, this practically bringing about an identity of all the Linotype interests in the world. As regards Linotype and Machinery, 98 per cent. of the issued share capital has been transferred to International Linotype, Limited, which has given its own shares in exchange, at the rate of 10s. of International shares for every £1 of Linotype and Machinery preference shares, and 2s. 6d. of International shares for every £1 of Linotype and Machinery ordinary shares. International Linotype in exchange for the preference and ordinary shares of Linotype and Machinery has received (and holds) 14,403 shares of the Mergenthaler Linotype Company of New York, the total number of the New York company's shares to be issued against the issued capital of Linotype and Machinery, if transferred, being 14,700 of $100 each. The authorised capital is £2,500,000 in shares of £1, half being 6 per cent. cumulative preference, with a priority as to capital, and half ordinary, and £950,007 preference and £1,000,000 ordinary have been issued and are fully paid.

Power was taken to issue debenture stock for £1,500,000 (half A and half B), and £673,617 of A stock and £750,000 (the whole) of B stock were issued; the two debenture stocks bear 4½ per cent. interest, payable January 1 and July 1, and the date for repayment at par was fixed for July 1, 1963, while power was reserved to the company to redeem either of the stocks (now) at any time, on six months' notice from the company, at 110 per cent., and by means of purchases the amount of A debenture stock was reduced to £662,918, and of the B debenture stock to £700,866. The repayment of the debenture stocks in 1963 was originally assured by redemption policies in the Sun Life Assurance Society as regards the A stock, and in the Norwich Union Life Insurance Society as regards the B stock. In 1915, however, a scheme was brought forward, was accepted by the debenture stock holders, and has been carried into effect, for the surrender of the redemption policies for sums of £52,614 as regards the A stock and £53,912 as regards the B stock, which amounts were handed to the respective trustees, who are also to receive sums equivalent to the half-yearly payments (£2,337 14s. 2d. as regards each stock) for premiums formerly made to each of the insurance companies, as well as a sum equivalent to the half-yearly interest on stock of the two issues purchased and cancelled, all moneys thus handed over to the trustees to be applied to the purchase of stock of the two issues in the open market, or by tender, while if so requested by the company the trustees are to apply funds in their hands to drawings of stock at par. The policies have been duly surrendered and the money handed to the trustees, who have partly used it in the purchase of stock, and the amounts now outstanding of A stock is £590,899, and of B stock, £629,965. It is estimated that if the trustees are able to purchase stock at an average price of 75 per cent. the entire issues of A and B debenture stocks will be redeemed by June 30, 1944, or nineteen years earlier than the original trust deeds provided, and even if they are only able to purchase stock at an average price of par the entire debenture stocks will be redeemed by December 31, 1955, or seven and-a-half years earlier than the original trust deeds provided. A loan of £63,000 has also been obtained.

The accounts are made up annually to June 30, and submitted in November. The first dividend paid on the preference shares since the present company was formed was 1 per cent. on March 25, 1908, while a similar distribution was made on September 29, 1908; on January 1, 1912, a distribution of 10 per cent. was made on the preference shares—as to multiples of £1 by the allotment at par of A debenture stock, and as to fractions of £1 in cash; and on January 1, 1913, a distribution of 6 per cent. was made on the preference shares—as to multiples of £1 by the allotment at par of B debenture stock, and as to fractions of £1, in cash. In 1907-8 there was a net profit from the business, after meeting interest charges and depreciation, of £45,636; in 1908-9 of £31,295; in 1909-10 of £45,722; in 1910-11 of £86,136; in 1911-12 of £66,989; in 1912-13 of £70,139; in 1913-14 of £57,483; and in 1914-15 a deficit of £55,127, and on June 30, 1915, there was a reserve fund of £113,562 including £93,961, the surrender value to June, 1914 of debenture stock redemption policies, and there was at the same date a credit to profit and loss of £151,281, as against £206,408 brought down. Manaos Improvements, Limited.—*Directors:* R. B. Phillpotts (Chairman), H. Collet (Managing Director), H. H. Gordon, J. Gordon and E. H. Tootal. *Secretary:* H. Sulman. *Office:* 169, Dashwood House, E.C.—The company was registered February 26, 1906, to acquire a concession granted by the government of the state of Amazonas, Brazil, for the supply of water and the service of sewage to the city of Manáos. The concession was given for a term of sixty years from the date of the completion of the works, at the expiration of which period the properties, buildings, works and accessories were to revert to the state without payment, the government guaranteeing interest at 8 per cent. per annum during construction, on the capital actually expended on the works. During the term of the concession the company was given exclusive rights. The company was also exempt from payment of state or municipal taxes on the material, buildings, and services connected with the concession, and the state government undertook to obtain from the federal government a similar exemption from duty on all the material imported, including coal, for construction and for working the services. Tariffs were fixed by the government, to be paid in Brazilian currency if the exchange be above 14d. per milreis, or if below they are to be paid in gold at the exchange of 14d. or its equivalent in currency. The company took over existing waterworks, which were subsequently extended, and new works of water supply and sewerage were being constructed. Under a revised contract, dated March 2, 1911, between the government of the state of Amazonas and the company, it was provided that the company should reduce the rates to be charged both for the water supply and the sewerage service, and, further, that it should detint the water supply. On September 24, 1912, the company intimated to the state fiscal engineer that it was, on and from that date, fully prepared to deliver detinted water to the city and, at the same time, asked for permission both to do this and to levy the rates authorised in the above-mentioned contract. Permission to levy the rates, however, was refused by the governor, who addressed a letter to the fiscal engineer stating that he would not accept the process of detinting "because it was not provided for in the contract." The position was placed in the hands of the British Foreign Office, and ultimately with the assistance of the federal government a revised contract was entered into in April, 1913, under which the company agreed to the water rate being reduced to half a real per litre, and the sewage to 4 per cent. on the rental value, the former rate to be paid by the tenant, the latter rate by the landlord. "Owing to the good offices of the federal government, the state of Amazonas was enabled to borrow sufficient money to pay up by May, 1913, the whole of the arrears of guaranteed interest to December 31, 1912. This amounted to, in round figures, £90,000. On the signing of the new contract in April, 1913, the company still required about £105,000 to complete the capital works, and it was intended to raise this money by an issue of the second debentures which had been authorised up to £500,000. Whilst arrangements were being made in London to this end, news was received in June, 1913, that the company's premises at Manáos were attacked by a mob, gutted from top to bottom, the records taken out into the street and destroyed absolutely, no protection being afforded to the company by the state authorities until seventeen hours later. In consequence of this, and the difficulty of continuing operations, the company gave notice to the state government of its intention to cease pumping water as from August 17, 1913.

On that date the state government took forcible possession of all the company's property in Manáos. The whole matter has been placed in the hands of the British Foreign Office."

The authorised capital is £400,000 in shares of £10, half being 7 per cent. cumulative preference having a priority as to capital, and half ordinary, and all the preference and £140,500 ordinary have been subscribed and called up, the vendors having taken 1,000 preference and 12,000 ordinary shares, while purchasers of the debentures, referred to below, have the option to subscribe at par for any part of the remaining ordinary shares the company may propose to issue. There are also 6 per cent. debentures of £20 and £100 each for £500,000, with interest payable June 1 and December 1, and the principal repayable at par within 42 years, from a cumulative sinking fund of 1 per cent. per annum, to commence in 1915, and applicable to annual drawings in April, while the company retained the option of redemption at any time after June 15, 1915, on six months' notice Power has been taken to create second debentures up to £500,000, and £150,000 of these debentures are held by the bankers as collateral security for advances of £29,903. In November, 1912, holders of the first debentures agreed to grant an extension of six months until June 1, 1913, for the payment of the half-yearly coupon due December 1, 1912, but this indulgence was not found necessary, the coupon being paid after a few days' delay, while the coupon due June 30, 1913, was paid at due date. In November, 1913, holders of the first debentures sanctioned a scheme to defer payment of the interest on their debentures for the two half-years to June 1, 1914, until December 1, 1914, and in November, 1914, the debenture holders agreed to defer payment of interest on the debentures until the expiration of six months after the conclusion of peace in Europe, and also to defer the commencement of the sinking fund. In November, 1913, the debenture holders also sanctioned the creation of £50,000 of 6 per cent. prior lien registered bonds, and early in 1914 the prior lien bonds were offered for subscription at 95 per cent., £44,800 being allotted. The prior lien bonds are of £100 each, have interest payable February 1 and August 1, the principal is repayable at par February 1, 1924, or earlier, at the option of the company, on one month's notice, and they are secured by a floating charge on the entire undertaking of the company, present and future, in priority to the first and second debentures. The proceeds of the prior lien bonds were to be applied to the repayment of advances, the maintenance of the company's claim before the federal government of Brazil for an equitable a justment of its difficulties, and for the general purposes of the company. Interest on the prior lien bonds has been paid to date.

The accounts are made up annually to June 30, and submitted in November. The preference dividend is in arrear as from May 1, 1908. In 1912-13, after taking credit for guaranteed interest (£25,364) in respect of works completed to December 31, 1912, and charging debenture interest, a credit to profit and loss of £4,780 brought down was converted into a debit of £7,378, which in 1913-14 was increased to £49,000 (see above as to present relations between the company and the government, and the deferring of first debenture interest). Voting power, one vote for each share of either class. Director's qualification, 50 shares of either class. Transfer form, ordinary; fee, 2s. 6d. per deed. Telegraphic address, Impranaos, Ave, London. Telephone number, 4775 London Wall. The preference shares and debentures are quoted in the official list.

Mexican Cotton Estates of Tlahualilo, Limited.—*Directors:* Sir A. H. Brown, Bart., J. B. Potter, H. P. Sturgis and H. A. Vernet. *Secretary:* A. G. Pollock. *Office:* 119-25, Finsbury Pavement, E.C.—The company was registered July 3, 1903, and has issued its securities against those of a Mexican company of practically similar title which was known here by the placing, in October, 1896, of £350,000 6 per cent. first mortgage debentures. The Mexican company had issued $2,600,000 of share capital, all of which, and all of the outstanding debentures for £331,600 of the Mexican company, are now held by the English company, which has issued £250,000 in fully-paid shares, £299,900 in 6 per cent. debentures (part of £300,000 authorised), and £100,000 in income certificates, all fully paid. The debentures are of £100 each, are secured by a first floating charge on the bonds and shares held in the Mexican Company, have interest payable April 1 and October 1, and are redeemable at 105 per cent. by annual drawings, commencing October 1, 1904, or by purchases under 105, by the operation of a cumulative sinking fund of £6,300 per annum, plus any profits remaining after paying 7 per cent. per annum on the ordinary shares, while the company has reserved the right to redeem all the outstanding debentures at any time on six months' notice; amount of debentures outstanding, £266,300. The income certificates are registered, of £1 each, carry 6 per cent. cumulative interest payable only out of profits on April 1 and October 1, while they are to be redeemed out of any profits available after providing for interest and sinking fund on the debentures and interest on the certificates themselves; certificates for £5,247 have been redeemed by purchase, and the amount of certificates outstanding, £94,729. The shares are to receive no dividend until all the income certificates have been redeemed, and thereafter they are to receive not more than 7 per cent. per annum, non-cumulative, until the whole of the debentures of the English company have been redeemed, while subsequently they are to take the entire profits. Of the share capital of the English company, all but £10 was allotted to trustees, who have issued their own certificates against the shares, the object being to keep the control of the company in the hands of the debenture holders.

The accounts are made up annually to May 31, and usually submitted in November. No dividend has yet been paid on the shares. Interest on the debentures has been paid to October 1, 1913, and that on the income certificates to October 1, 1907, while the debenture sinking fund has been provided up to the close of 1908-9 only, and in regard to the debenture sinking fund for the five years to May 31, 1912, the directors, after consultation with the debenture holders' trustees, decided that the amount should be retained in a form in which it will be available either for the payment of future debenture interest, or for possible exceptional expenditure in connection with the negotiations with the Mexican government over the company's water rights. These negotiations resulted in 1913 in a settlement of matters in dispute, the government undertaking to acquire and turn over to the company certain water rights to take the place of the rights granted under the original concession, while the company waived its claim against the government for indemnity; "the purchase of the new water rights by the government awaits the sanction of congress." In respect of 1906-7 there was a surplus, after meeting the charges referred to, and including £760 brought down, of £15,268, of which £8,000 was placed to reserve; in respect of 1907-8 there was a deficiency, after including £7,268 brought forward, and providing for the service of the debentures only, of £11,723, which was met by a transfer from the reserve; in respect of 1908-9 there was a deficiency, after meeting the service of the debentures, of £7,749; in 1909-10, after meeting interest (only) on the debentures, the credit balance brought forward was increased to £17,395; in 1910-11, after meeting interest (only) on the debentures, the credit balance brought forward was increased to £19,600; and in 1911-12, after meeting interest (only) on the debentures, the credit balance brought forward was reduced to £12,338, and this was carried over.

Owing to the disturbed state of the country the company found itself unable to realise its 1913 cotton crop, valued at £300,000, and with an entire depletion of its funds and working capital a meeting of debenture holders was held in December, 1913, to authorise the creation of £100,000 prior lien debentures, to be lodged as security for temporary advances required, and £12,300 has been issued as collateral. Political and financial conditions in the country remaining very disturbed, the debenture holders agreed to postpone payment of the coupons due April 1 and October 1, 1914, and April 1 and October 1, 1915, until April 1, 1916, and these coupons are to carry interest at the rate of 6 per cent. per annum from their due dates until the actual dates of payment. No accounts have been issued since those for 1911-12, but this notice has been officially revised.

Director's qualification, one share. Transfer form, common; fee, 2s. 6d. Telegraphic address, Mexcotla, Ave, London. Telephone number, 2893 London Wall. The debentures are quoted in the official list. Latest prices—debentures, 45; certificates, 1s.

Mexican Eagle Oil Company, Limited.—*Directors:* Dr. C. W. Hayes and T. J. Ryder (Vice-Presidents), F. D. Barroso, G. Bénard, J. B. Body, S. M. Cancino, Lord Cowdray, L. Elguero, G.de Landa y Escandon, and L. Riba (all except Lord Cowdray and G. Bénard being resident in Mexico). *Office:* Mexico City.—*London Agency:* 47, Parliament Street, S.W.—The company (the local title of which is Compañia Mexicana de Petroleo, El Aguila, S.A.) was incorporated under the laws of the republic of Mexico in August, 1908, and acquired from S. Pearson and Son, Limited, five concessions to exploit for oil on the national and vacant lands belonging to the federal government, and the governments of the states of Vera Cruz, San Luis Potosi, Tamaulipas, Tabasco and Chiapas, situated north and west of a straight line drawn from the city of Vera Cruz to Puerto Angel on the Pacific coast. The concessions expire about 1954, and are exclusive, except as regards the state lands of Tamaulipas. In 1912 the company acquired the remainder of the oil properties and interests in Mexico of S. Pearson and Son, Limited, including its oil leases for varying periods (covering an area of over 500,000 acres), wells, and a refinery at Minatitlan, for

$24,000,000 (Mexican currency), which was satisfied by the issue of $20,000,000 (Mexican currency) fully-paid ordinary shares at a premium of 20 per cent., the capital being at the same time increased to a corresponding extent. The company also owns leasehold properties of over 300 square miles, mainly situated between the Tampico and Tuxpam rivers, as well as freehold property in Mexico City, numerous installations throughout the republic, &c., &c., including 100,000 shares of £5 each (£1 paid) in the Eagle Oil Transport Company, Limited. The authorised capital is now $60,000,000 (Mexican currency) in shares to bearer of $10 (Mexican currency), $8,500,000 being in preferred ordinary shares, and $51,500,000 in ordinary, and all the preferred ordinary and $41,500,000 of the ordinary have been subscribed and paid up, including $20,000,000 ordinary issued fully paid in 1912 in payment for additional properties acquired, as stated above. After placing 5 per cent. of the profits annually to reserve (until that fund amounts to one-fifth of the share capital), the preferred ordinary shares rank first for 8 per cent. non-cumulative dividends, and after payment of a like rate on the ordinary both classes rank equally for further dividends. In May, 1910, the London City and Midland Bank, Limited, was authorised by the owners (S. Pearson and Son, Limited) to offer for sale all the preferred ordinary shares at par. There are also £1,500,000 sterling convertible 6 per cent. first mortgage bonds to bearer, of £1,000, £500, £100 and £20 each (part of a total authorised of £3,000,000), offered for sale in June, 1913, through the London City and Midland Bank, Limited, at 96½ per cent. ; coupons are payable June 30 and December 31, in London, Berlin and Brussels, and the company reserves the right, at not less than three months' notice, to pay off the whole of the bonds outstanding at 110 per cent. on any interest date after June 30, 1918, while an annual sinking fund, commencing in the year ending June 30, 1919, is to be provided, sufficient to redeem the bonds at 105 per cent. not later than December 31, 1931, such sinking fund to be applied in the purchase of bonds at under 105 per cent., and accrued interest, or by drawings at that price, holders of the bonds having the right at any time prior to July 1, 1918, on fourteen days' notice, of conversion into fully-paid ordinary shares at the rate of one share for every £3 of bonds ; the bonds are secured by a specific first charge on certain properties, and upon all plant and equipment used in connection therewith. There were also, at June 30, 1913, bankers' loans amounting to $13,351,850, which have since been discharged by the proceeds of sale of the above-mentioned £1,500,000 first mortgage bonds.

The accounts are made up annually to June 30, and submitted in Mexico within six months thereafter. For 1910-11, 1911-12 and 1912-13, 8 per cent. per annum was paid on the preferred ordinary shares, but there was no distribution on the ordinary, while for 1913-14 8 per cent. was paid on both classes, and in respect of 1914-15 the preferred dividend has been paid, and an interim dividend of 4 per cent. was paid on the ordinary at the end of June, 1915. For the year to June 30, 1913, after payment of the preferred ordinary dividend, placing $2,607,089 to fields redemption account (increasing it to $4,300,712, after transferring $1,100,000 in reduction of exploration and field expenditures), $943,918 to depreciation reserve account (increasing it to $1,506,418), and $230,775 to legal reserve account (increasing it to $359,116), a credit balance of $631,805 brought forward was raised to $4,336,539. Share premium reserve, $4,000,000 ; miscellaneous reserves, $185,565. No accounts later than those for 1912-13 have been published, owing to the unusual conditions in Mexico. Dividends on the preferred ordinary shares are payable half-yearly at the end of June and December in London and Mexico, and coupons of the bonds in London, Berlin and Brussels. The preferred ordinary shares and bonds are quoted in the official list. Latest prices—common, 32s. ; preferred, 32s. 9d. ; bonds, 85.

In 1909 the undertaking of Mexico City Rastro Company (S.A.), Limited, owning exclusive concessions until December 31, 1926, for an abattoir in Mexico City, was acquired, while the Mexican government granted to the company a rebate to a large extent of the slaughtering taxes previously existing, as well as certain other rights. A reorganisation plan was brought forward in July, 1911, and this has been carried out, the new company having been incorporated under the laws of the state of Maine, U.S., on January 22, 1911. In April, 1914, it was announced that the Mexican government had acquired control of the company by the purchase of 51 per cent. of the common shares, and the government undertook to guarantee unconditionally the payment of the principal and interest of the two classes of the bonds, a statement of this guarantee to be endorsed by the agent of the Mexican government upon each bond, and appointed Messrs. All payments are made, at the option of the holder, either in sterling in London (at the fixed rate of 4s. 1d. per dollar, at Parr's Bank, Limited, Bartholomew Lane, E.C.), or in currency in New York. These bonds form a second charge on the whole undertaking. All payments are to be made, at the option of the holder, either in sterling in London (at the fixed rate of 4s. 1d. per dollar, at Parr's Bank, Limited, Bartholomew Lane, E.C.), or in currency in New York. Interest on these bonds as well as the principal is now guaranteed, as stated above, by the Mexican government, the guarantee having been endorsed on the bonds, but no payment of interest has yet been made.

In 1912 a rearrangement of the capital was effected, 19s. being written off each of the 150,000 ordinary shares of £1 and 86,707 old preference shares being written down by converting 43,354 into participating preferred shares of £1 and 43,353 into ordinary shares of 1s., while 168,353 new participating preferred shares of £1, and 106,647 ordinary shares of 1s. each were created, thus increasing the capital to £265,000, consisting of £250,000 in preferred participating shares of £1, and £15,000 in ordinary shares of 1s. each. The participating preferred shares rank for dividends of 6 per cent., and after distributing the remaining profits to the extent of £3,000 to the ordinary shareholders, and any sums which may be voted to the directors by the company in general meeting, any surplus profits remaining are to be distributed—as to one moiety thereof among the holders of the participating preferred shares, and as to the other moiety among the holders of the ordinary shares; in the event of a winding-up the participating preferred shares are to have priority as regards capital, and any surplus assets remaining are to go to the ordinary shareholders. Loans have been obtained, the amount of which, however, is not stated separately in the balance sheet.

Monterey Railway, Light and Power Company.—*Directors:* Sir W. Mackenzie (President), Sir D. D. Mann (Vice-President), Sir H. S. Holt, K.B., R. M. Horne-Payne (London, Eng.), Z. A. Lash, K.C., and Sir E. Walker, C.V.O. *Secretary:* R. P. Ormsby. *Head Office:* Toronto, Canada. *Registrar and Secretary in London:* British Empire Trust Company, Limited, 34, Nicholas Lane, E.C.—This company was incorporated under the laws of the Dominion of Canada on February 13, 1905, and owns a street railway concession for Monterey, the capital of the state of Nuevo Leon, Mexico, this concession being for 99 years in the first instance, dating from March 10, 1905, while after the expiration of the period named the state has the right to acquire the real and personal property appertaining to this concession, as a going concern, the price to be settled by a board of three appraisers. The company also owns a gas and electric light concession from the state government for 99 years from March 10, 1905, which runs concurrently with the street railway concession. The Monterey Railway, Light and Power Company also owns the whole of the issued capital stock of the Monterey Waterworks and Sewer Company, Limited, the Monterey Light and Power Company, and the Monterey Plumbing Company, as well as all the bonds issued by the Waterworks Company. The Waterworks Company is working under a concession granted by the government of the state of Nuevo Leon, dated October 19, 1904, and providing that if during 99 years from the commencement of the operation of the system the gross revenue therefrom is less than 10 per cent. on the invested capital, as approved by the said government, there is to be paid by the government to the Waterworks Company a sufficient sum to make up, with the revenue actually received from the waterworks and sewage earnings, a sum equal to 10 per cent. on such invested capital, out of which the Waterworks Company has to provide the expenses of operation and ordinary maintenance (the amount of capital so far expended is agreed at approximately $5,000,000 Mexican). The government has, after the system has been operated 40 years, the right, subject to six months' notice, to purchase the entire property for a sum equal to 16⅔ times the average annual net profits received by the Waterworks Company during the three preceding years. If this right is not exercised at the end of the 40 years, it may be exercised at the end of any 10 years period up to 99 years from the commencement of operations. If exercised at the end of the 99 years the state has the right to pay the price in government bonds. The Waterworks Company and all its properties and any stocks, bonds, &c., issued are exempt from all state and municipal taxes for 99 years. The Monterey Light and Power Company is conducting an electric light, gas, and power service.

The authorised share capital is $5,000,000 in shares of $100, $500,000 being in 5 per cent. cumulative preference, and $4,500,000 in ordinary, and all the preference, and $4,100,000 of the ordinary have been subscribed and paid up. In December, 1908, an issue was made at 89 per cent. of £1,000,000 5 per cent. first mortgage debenture stock, secured by a trust deed in favour of the British Empire Trust Company, Limited, 34, Nicholas Lane, E.C., and the National Trust Company of Toronto, constituting a first mortgage on the street railway, and on the securities held in the subsidiary companies, a further £100,000 was issued in July, 1910, and £100,000 in January, 1911, making £1,200,000 outstanding; interest is payable February 1 and August 1 (that due February, 1914, and since being in arrear), and the stock is repayable at par August 1, 1949. The company has reserved power to issue further stock or bonds, ranking pari passu with the above-mentioned first mortgage debenture stock, (1) at the rate of £6,000 per mile for all additional lines of electric railway constructed or acquired by the company, and (2) to an amount not exceeding the actual cost price to the company of any additional shares or securities of other companies deposited with the trustees, subject to the approval of one of the trustees. In the event of the sale of any of the properties mortgaged to the debenture stock, purchases may be made of the debenture stock until the year 1918, at or below 105 per cent., plus accrued interest, or the funds may be employed in redeeming debenture stock, on six months' notice, by drawings at 105 per cent., plus accrued interest, and after 1918 at par. Power

is also reserved to the company to sell the securities of the Monterey Waterworks and Sewer Company, Limited, and if the cash proceeds thereof exceed the sum of the par value of the securities (excluding the shares sold), and of the indebtedness of the Waterworks Company to the Railway Company other than indebtedness under the bonds or other securities sold, by more than 10 per cent., any excess is to be paid to the company to be applied as it thinks fit, otherwise the net proceeds are to be applied in the purchase or redemption of the debenture stock or bonds at 105 per cent. and accrued interest if before August 1, 1918, and at par and accrued interest if after that date. There were also loans at December 31, 1913, of $1,150,937. The books of the debenture stock are kept at the offices of the British Empire Trust Company, Limited, where transfers are effected on common forms, in multiples of £1; fee, 2s. 6d.

The accounts are made up annually to December 31, and those for 1913 were submitted in June, 1915. The preference dividend has been paid to the end of 1913, but there has so far been no dividend on the ordinary shares. After meeting the preference dividend $206,888 was carried forward at the close of 1909; in 1910 the credit balance was increased to $381,174; in 1911 to $423,161, after placing $150,000 to reserve; in 1912, to $473,846, after placing $150,000 to reserve; and in 1913 reduced to $451,098, after placing $150,000 to reserve, increasing that fund to $450,000. The report for 1914 has not yet (November 21, 1915) been issued, but this notice has been officially revised. In a circular issued in January, 1914, and in subsequent circulars, the directors stated that, in consequence of the conditions obtaining in the Republic of Mexico, arrangements with the government of the state of Nuevo Leon for a settlement of the claim of the Monterey Waterworks and Sewer Company under the government's guarantee of 10 per cent. on the capital expenditure had not been completed, although payment of substantial sums on account had been made. Notwithstanding the foregoing circumstances the revenue of the company would have been sufficient to provide the interest on the debenture stock, at the normal rate of exchange between Monterey and London, but on account of the low rate of exchange prevailing the directors regretted that they were compelled to postpone the payment of the interest on the 5 per cent. first mortgage debenture stock until such time as it is possible to transfer the money on reasonable terms. No payment has yet (November 21, 1915) been made in respect of the February, 1914, interest, and all subsequent payments are also in arrear. The debenture stock is quoted in the official list; latest price, 39.

In 1899 it was decided to reconstruct on an enlarged basis under the same title as before, and the present company was registered April 22, 1899. The authorised capital is now £130,000 in shares of £1, £30,000 being in 5 per cent. cumulative preference shares, with a priority as to capital, and £100,000 in ordinary shares, of which £28,815 preference and £62,646 ordinary have been subscribed and paid up. Montgomery Ward and Co.—*Directors:* C. H. Thorne (President), J. C. Maddison, C. D. Norton, G. A. Thorne, J. W. Thorne, R. J. Thorne, W. C. Thorne and J. I. Zook. *Office:* Chicago.—The company was incorporated in January, 1913, under the laws of the state of New York, to "conduct a catalogue or mail order business" in various articles, such as clothing, furniture, agricultural implements, groceries, &c., &c. The authorised capital is $10,000,000 in 7 per cent. cumulative preferred shares of $100, of which $5,000,000 has been issued, is fully paid, and carries no liability, while there are 300,000 common shares of no par value (represented in the balance sheet to December 31, 1914, by $8,186,396), and in February, 1913, one-half of the preferred capital was offered for sale ($1,200,000 having already been applied for and allotted in full) at 103½ per cent. (New York terms) by Messrs. Robert Fleming and Co., 8, Crosby Square, E.C., while the lists were simultaneously opened in New York and Chicago. The entire amount outstanding of the preferred capital, but not any part thereof (except as sinking fund as stated below), is redeemable at 115 per cent., and accumulated dividends, at the end of any fiscal year, on sixty days' notice. The preferred shares have a priority as regards dividend and capital, and are entitled to 115 per cent. and accrued dividend on a dissolution or winding up. No mortgage can be placed on the company's property except with the consent of the holders of 75 per cent. of the preferred shares outstanding; no additional preferred shares can be authorised, or issued, beyond the present limits of $10,000,000, without the consent of a majority of the preferred shares outstanding; and if any additional preferred shares are issued beyond the existing $5,000,000 holders of the existing shares of that class are to be offered the first opportunity to subscribe for the new shares; and, moreover, the remaining $5,000,000 authorised but unissued preferred shares may not be issued unless for the two years preceding such issue the average net earnings shall have equalled the sinking fund and two-and-a-half times the preferred dividend requirements after such issue. Beginning with January 1, 1916, a cumulative sinking fund of 2½ per cent. per annum of the preferred capital outstanding becomes operative, such fund to be applied to the purchase of shares at not over 112½ per cent. and accrued dividends, while if the shares cannot be so purchased the fund when it equals a sum sufficient to retire 10 per cent. of the preferred capital outstanding is to be used to retire such shares pro rata from each holder at 112½ per cent. and accrued dividends, but such call for shares shall not be made oftener than once a year. No dividend shall be paid on the common shares until $500,000 shall have been added to the surplus of the company from earnings in each of the years 1913, 1914 and 1915, and $300,000 annually thereafter; and if there is default in the

payment of two consecutive quarterly dividends on the preferred shares, or the sinking fund requirements remain in arrear for more than one year, or the net quick assets fall below 100 per cent. of the par value of the preferred shares outstanding, then the preferred shares shall have full and sole voting power, but otherwise the voting power is lodged in the common shares alone. The proceeds of the preferred shares were to be applied to the redemption of the entire bonded and floating debt, and provision of working capital. For 1913 and 1914 the full dividend was paid on the preferred shares, but no distribution was made on the common. After meeting the preferred dividend there were undivided profits for 1914 of $1,660,093, increasing the accumulated surplus to $2,227,517. The dividend at the rate of 7 per cent. per annum on the preferred shares was paid in April, July and October, 1915. The preferred shares are quoted in the official list; latest price, 115½.

Molson, all resident in Canada. *Office:* Montreal, Canada.—The Montreal Cotton Company was incorporated in 1874 under letters patent of the province of Quebec, the properties being situated at Valleyfield, in the province of Quebec. In order to deal with the accumulations of surplus, and distribute them amongst the then shareholders, it was decided in the latter part of 1911 to reconstruct under the title of the Montreal Cottons, Limited, which was incorporated under laws of the province of Quebec, and against the old share capital of $3,000,000 there have been issued equivalent amounts of new 7 per cent. preferred shares and new common shares. Interest is payable May 1 and November 1, and the debentures are to be repaid November 1, 1943, at par, but the company has reserved power to redeem all or any of the debentures at any time after November 1, 1918, at 105 and accrued interest, any partial redemption to be by drawings; a sinking fund is provided against redemption, and this fund may be used in purchasing the debentures in the open market at or under par, while after November 1, 1918, the company, with the approval of the trustees, may require any portion of the sinking fund to be applied in purchasing the debentures at a price not exceeding 5 per cent. premium and accrued interest, or in redeeming debentures by drawings at 105 and accrued interest. Moreover, in the event of the voluntary liquidation of the company before the maturity of the debentures, they are to be redeemed at not less than 5 per cent. premium and accrued interest. The debentures are secured by a first mortgage on all the company's real estate, mills, &c., with the exception of certain farm lands, cottages, &c., the book value of which does not exceed £45,000. The debentures are to bearer, but may be registered as to principal at the office of the issuing company, and registered debentures may be re-exchanged into bearer debentures, the fee either way being 1s. per debenture. Municipality of Para Improvements, Limited.—*Directors:* J. Brailsford, Dr. J. P. de Carvalho (Paris) and F. M. Voules. *Secretary:* T. M. C. Steuart. *Office:* 65, Bishopsgate, E.C.—The company was registered February 16, 1907, to acquire a concession from the municipality of Para, Brazil, for the construction and maintenance of a system of sewerage for the first official league of the city. "By virtue of this concession the municipality, in order to guarantee the interest on the capital expended for the construction of the works, has decreed for the entire duration of the concession the imposition of a tax of 6 per cent. on the rental value of all buildings situated within the zone of the first patrimonial league. For the purposes of the collection of this tax, the annual official valuation of houses and buildings in the city will be used. The municipality has guaranteed that the total annual valuation shall not be less than 14,440 contos of reis, which, at the fixed exchange guaranteed by the municipality of 1s. 4d. per milreis, is equal to £962,666 sterling. The minimum annual income is therefore guaranteed at £57,760." The concession is for a period of seventy-four years, commencing from June, 1906, and on its expiration the drainage system is to revert to the municipality free of cost. The company is exempt from all municipality taxes for everything relating to the drainage system. Under its concession the company has further

been granted the right to supply, at prices to be approved by the city, and instal lavatory fittings and accessories in all private premises during the entire period of the concession and at the occupiers' expense, the municipality collecting the payment therefor.

The authorised capital is £400,000 in shares of £1, of which £366,673 has been issued and is fully paid. There are also 6 per cent. first mortgage debentures, of £20 and £100 each, for £600,000, of which £150,000 was offered for sale at the price of 92½ per cent. in July, 1910, through the London City and Midland Bank, Limited, on behalf of the purchasers, Messrs. Dunn, Fischer and Co., 41, Threadneedle Street, E.C. The present authorised amount of the debentures is £750,000, but this may be increased, providing the income guaranteed by the city of Para exceeds by one-fourth the amount required to meet the interest and sinking fund not only of the debentures already issued, but also upon any proposed increase ; the debentures are specifically charged on the guaranteed income as above, have coupons payable January 1 and July 1 in London (by the London City and Midland Bank, Limited, 5, Threadneedle Street, E.C.), Brussels, Paris, Berlin, Amsterdam and Hamburg, or elsewhere, while the debentures are repayable at par in 1949 by a cumulative sinking fund of 1 per cent. per annum, which was to have commenced on June 1, 1914, to be applied by purchase in the market so long as the price shall be at or below par, or by drawings at par, and the company has reserved the right to redeem all or part of the debentures at par at any time, on giving six months' notice. The contract for the works was given out to J. G. White and Co., Limited. "The municipality, in order to provide, during the construction period, interest upon the capital employed, has agreed to pay to the company the sum of 900 contos of reis (equal to £60,000 sterling), payable in instalments as the construction of the works proceeds, provided that works of double the amount of each instalment shall have been carried out."

The last accounts were for the fifteen months to December 31, 1914, and were submitted in June, 1915. Owing to a variety of circumstances the works have not yet been completed, and it was found necessary in 1911 to carry on negotiations with the municipality, as a result of which certain amendments of the original concession were obtained. Since then fresh difficulties have arisen, and the works have been entirely closed down. "Negotiations are now pending (November, 1915) with the Municipality of Para whereby it is intended that the debenture holders should receive bonds of the municipality in exchange for their debentures." In the meantime an extension of one year has been added to the time stipulated in the concession for the completion of the drainage system. Interest due January 1, 1914, and since, on the debentures has not been met, and in January, 1914, a receiver was appointed on behalf of the debenture holders. First mortgage debentures to the amount of £349,000 are quoted in the official list ; latest price, 10.

National Ice and Cold Storage Company of California, U.S.A.—*Directors:* N. Ohlandt (President), J. A. Buck, G. McNab, J. Martin, G. G. Moore, A. F. Morrison and F. B. Whipple. *Office:* San Francisco.—The company was formed in November, 1912, under the laws of California, U.S., to take over the business, property and assets of a company of almost similar title, with the exception of money, book accounts, and bills receivable. The authorised share capital was $20,000,000 in shares of $100, $15,000,000 being in common shares and $5,000,000 in 7 per cent. cumulative preferred shares, while first mortgage 6 per cent. thirty-year gold bonds for $15,000,000 were created. The purchase consideration consisted of all the common shares and $3,530,000 of the bonds. Since 1913 the capital has been reorganised—the total of $15,000,000 common shares has been reduced to $11,900,000, and the amount of preferred shares issued has also been reduced to $982,000, while of the common shares $6,900,000 is, in certain events, to be converted into $1,725,000 of preferred shares. Of the bonds, $3,851,000 has in all been issued, including the $3,530,000 given to the vendor company, and of these latter $1,421,000 was sold in America, and $2,430,000 (£500,000) was purchased by the Investment Registry, Limited, 2, Waterloo Place, S.W., and offered for sale in July, 1913, at 98 per cent. The bonds offered for sale here are of £20, £50 and £100 each, with interest payable June 1 and December 1, while the bonds are to be repaid at par in 1942, but they may be redeemed at the option of the company at 105 per cent. on December 1, 1917, or on any subsequent interest date on ninety days' notice; the bonds are also redeemable after December 1, 1917, by annual drawings at 105 per cent., or by purchase at a lower price from a sinking fund. The bonds are secured by trust deeds constituting a first mortgage of the company's freehold and leasehold properties, and shares in subsidiary companies. While the total authorised is $15,000,000, the trust deed provides that not more than the amount now issued can be placed until the net earnings of the company (including net earnings arising from property which the company is to acquire by means of additional bonds proposed to be issued) are sufficient to pay at least twice the amount required for the annual interest on all bonds outstanding and to be issued. Payments are made free of all American taxes, in New York, or as regards the bonds placed here, in London (by the Investment Registry, Limited, as above). The bonds are to bearer, but those of £50 and £100 may be registered at the office of the Investment Registry, Limited, and registered bonds may be exchanged back into bearer, the fee charged being not more than 4s. per bond, in addition to the stamp tax. For 1913 the net income was $485,062; and for 1914, $490,345, there being at the close of the latter year an unappropriated surplus of $336,115, and reserves for depreciation, &c., of $236,270. Under this agreement the company received £275,200 of bonds, which have since been realised, and the proceeds (except about £12,000) applied in redeeming previously existing 7 per cent. debentures and telephone debenture stock, extinguishing certain capital liabilities, &c. The company has also the exclusive right to construct, equip and work the public service of telephones in Belem. The telephone system was put into operation in June, 1912. Parent Tyre Company, Limited.—*Directors:* H. Du Cros (Chairman), A. Du Cros, M.P. (Vice-Chairman and Managing Director), Earl of Albemarle, L. M. Bergin (General Manager), Sir W. G. D Goff, Bart., C. W. Hely and R. Watson. *Secretary:* A. Cunningham. *Office:* 150-2, Clerkenwell Road, E.C.—The company was registered May 6, 1896, as the Dunlop Pneumatic Tyre Company Limited, to take over the business of the Pneumatic Tyre Company, Limited, with other patents and rights, and in 1913 the name was changed as above; it further acquired a considerable shareholding in the Dunlop Rubber Company, Limited, this now consisting of 712,468 fully-paid shares of £1 each. In August, 1912, a scheme was brought forward for the consolidation of the trading of this company and the Dunlop Rubber Company, Limited, was approved by the proprietors, and has been carried into effect. Under this scheme the Tyre company has transferred to the Rubber company as from August 31, 1911, the goodwill, trade marks and designs, as well as all assets, with the exception of the shares of the Rubber company held by the Tyre company, certain other excluded investments amounting to £48,245, and about £4,600 of cash. The consideration receivable by the Tyre company is the sum of £1,126,790, of which £305,600 was to be satisfied by the assumption and ultimate redemption by the Rubber company of the outstanding debentures of the Tyre company and the payment in the meantime of interest thereon. £497,932 was applied in discharging certain liabilities of the Tyre company, and the balance of £323,258 was used by the Tyre company in paying for 129,303 ordinary shares in the Rubber company of £1 each at 50s. per share. Further, the Tyre company is to receive in perpetuity a royalty of 6 per cent. on the net profits made by the Rubber company, with the exception of the profit arising in respect of the premiums on the above-mentioned 129,303 shares, the royalty to be calculated on the profits after the usual allowances have been made for depreciation, and after the payment of debenture and income stock interest, and the dividend on the Rubber company's preference shares.

In 1906 the sum of 7s. 6d. per share was written off the ordinary shares (each of which was then subdivided into five shares of 2s. 6d., and subsequently consolidated into £1 shares), and 15s. per share off the deferred shares (which were then consolidated into £1 shares), and the authorised capital is now £2,125,000, £1,000,000 being in 5 per cent. cumulative preference shares of £1, having also a priority as to capital, £625,000 in 8 per cent. cumulative ordinary shares of £1, and £500,000 in deferred shares of £1, entitled to all the surplus divided profits; and power was taken to issue debentures for £1,000,000. Of the preference capital £994,990, of the ordinary £624,995, and of the deferred £499,962 have been subscribed and called up, and all the debentures have been issued, but there are now outstanding debentures for only £244,100, the liability, both principal and interest, of which has been assumed by the Dunlop Rubber Company, Limited (see below). The debentures are of £100 each, are secured by a trust deed, carry 4 per cent. interest, payable May 31 and November 30, and are to be repaid May 31, 1916,

at par, with the option to the company to call them for redemption at any time previously, on six months' notice, at 110 per cent. (in the scheme brought forward in August, 1912, it was provided that the rate of interest on the debentures should be increased from 4 to 4½ per cent., and the date of repayment extended to May 31, 1930, at 103 per cent., but these changes were subsequently dropped).

The accounts are now made up annually to August 31, and usually submitted about December. For 1902-3 the ordinary shares received 6 per cent. ; for 1903-4, 2½ (large appropriations having been made from profits to reinforce the working capital of the subsidiary companies in view of the expiration of the tyre patents) ; and for 1904-5, 4 (the sum of £266,535 then carried forward being subsequently written off goodwill). In 1906 the capital was reduced as above ; for 1905-6 the ordinary shares received 8 per cent. and the deferred 5 (on the reduced capital) ; for 1906-7, 8 and 7½ per cent. respectively ; for 1907-8 and 1908-9, 8 and 8 each time ; for the eleven months to August 31, 1910, 8 per cent. per annum on the ordinary and £7 3s. 4d. per cent. (actual) on the deferred shares ; for 1910-11, 4 and 3 per cent. respectively (paid as interim dividends) ; for 1911-12 the ordinary shares got 10 per cent. ; for 1912-13 the ordinary shares again received 10 (including 2 per cent. arrears), and the deferred shares 5 per cent. ; and for 1913-14 the ordinary received 8 per cent., and the deferred 7½. Pekin Syndicate, Limited.—*Directors:* Sir R. D. Awdry, K.C.B. (Chairman), T. A. Barson, A. Berthelot (Managing Director), R. de Cérenville, Comte G. du Chaylard, Comte de Ferol, H. Lejeune and Comte de Séguier. *Secretary:* T. Gilbert. *Office:* 110, Cannon Street, E.C.—The company was registered March 17, 1897, for the purpose of obtaining and developing concessions for mining, railway and other undertakings in China. In May, 1898, the syndicate acquired the sole right for sixty years to open and work coal and iron mines and petroleum deposits throughout certain specified districts in the province of Shansi, China, covering an area of approximately 20,000 square miles, and shortly afterwards a contract on similar terms was signed covering all that part of the province of Honan which lies to the north of the Yellow River. Certain railway rights were given under the concessions. The Chinese government is to receive a royalty of 5 per cent. on the prime cost of all minerals extracted; and of the net profits, after providing for 6 per cent. interest on capital employed and setting aside 10 per cent. of the profits as a sinking fund, the Chinese government is to receive 25 per cent. Largely in consequence of local opposition to the syndicate, and after extended negotiations, the Shansi concession was resold to the provincial authorities in January, 1908, for the sum of 2,750,000 taels, payable as to one-half on February 21, 1908, and the remainder in three equal annual instalments beginning May 19, 1909.

As the result of negotiations, which had extended over a considerable period with the Chinese authorities for closer co-operative measures between them and the Pekin Syndicate, a working agreement was entered into in May, 1915, with the approval of both the British and Chinese governments whereby an Anglo-Chinese corporation, to be known as the Fu Chung Corporation, has been created. Under the terms of the agreement the Fu Chung Corporation takes over all the coal produced by the Syndicate and the Chung Yuan Mining Company, a concern embodying all the native mining companies in the locality, and becomes the sole selling agent. In addition, the Fu Chung Corporation has been granted the exclusive coal-mining rights in the Hwai Ching Fu prefecture, outside the areas now operated by the Syndicate and the Chung Yuan Company, and further it has been granted special facilities for the employment of foreign capital in the two prefectures of Chang te Fu and Wei Hwei Fu, lying west of the Pekin-Hankow Railway, which concessions are for a period of sixty years from the date of the agreement. The nominal capital of the Fu Chung Corporation is $1,000,000, and is to be subscribed in equal proportion by the Syndicate and the Chung Yuan Company.

The authorised capital is £1,540,000, £1,500,000 being in Shansi shares of £1, £39,900 in ordinary shares of 2s., and £100 in deferred shares of 1s. In 1910, after prolonged negotiations, a scheme of arrangement was come to for the division of profits amongst the various classes of shares. Under this scheme the Shansi shares are to be entitled to 10 per cent. of the profits of the undertaking of each year until the sum paid in respect of such percentage shall amount to 100 per cent., and to one-half the surplus profits after providing for the above percentage whilst it continues payable, and afterwards to one-half the surplus profits in each year; the ordinary shares are to be entitled, subject to the rights as to dividends on the Shansi shares, to the whole of the remaining profits until they shall have received dividends amounting to 100 per cent., and afterwards, after distributing the profits applicable to the Shansi shares, the ordinary shares are to take 50 per cent. of the surplus; and the deferred shares are to be entitled, subject to the rights attached to the Shansi shares and ordinary shares, to 40 per cent. of the surplus profits of the company. In the event of a winding-up the entire share capital is to be repaid without any priority as to class, and after this has been effected the Shansi shares are to take 50 per cent. of the surplus assets, and the ordinary and deferred shares 25 per cent. each. The directors are entitled to 10 per cent. of the profits of the company, but they agree to forego the right originally in force to 10 per cent. of the surplus assets in the event of the winding-up of the company. Of the Shansi shares, £1,202,822 has been issued and paid up; and all the ordinary and deferred shares have been issued and paid. The ordinary shares were originally of £1 each, but in 1910 they were subdivided into shares of the denomination of 2s.

The accounts are now made up annually to June 30, and submitted in December. No dividend has yet been paid. The syndicate constructed a railway which was handed over to the Chinese government in June, 1905. The syndicate holds 21,250 ordinary out of 100,000 and 225 deferred shares out of 1,000 of £1 each in the Chinese Central Railways, Limited, a company formed in 1904 with a view to consolidating British interests in the Yangtse Valley, and 500 founders' shares and 15,350 ordinary shares in the Banque Industrielle de Chine, established in 1913. The Honan coal mines have been brought to the producing stage, the output in the year to June 30, 1913, having been 402,451 tons, in 1913-14, 459,372 tons, and in 1914-15, 260,428 tons (the decrease having been largely due to the European war), but the expenditure on the coalfields is at present in excess of the proceeds of sale of coal, the excess in 1915-16 having been £63,184, which was added to cost of property, etc., in China. In the year to June 30, 1912, the revenue from interest and sundry other sources was £65,114; in 1912-13, £51,368; in 1913-14, £47,405; and in 1914-15, £47,467, there being a net profit for 1914-15 of £21,773, which left a credit to profit and loss, after deducting £27,446 written off in the year for depreciation in value of investments, of £409,077. Cash balance at June 30, 1915, £57,966; investments, £694,085; shares in other companies, at cost, £102,474; sundry debtors, £28,744; stock of coal on hand, £15,013; sundry creditors, £16,759. Pernambuco Tramways and Power Company, Limited.—*Directors:* F. Holt (Chairman), E Dodsworth, E.Gudin, H. K. Heyland, W. Higgins, S. Jones and H. Maréchal. *Secretary:* H. Tattam. *Office:* 10-11, Finsbury Circus, E.C.—The company was registered January 24, 1913, and has acquired a concession granted in 1912 by the state government of Pernambuco for a period of fifty years for the building and equipping of a system of electric tramways for the state government of Pernambuco, and has since acquired the Companhia Trilhos Urbanos do Recife a Olinda e Beberibe and a mule tramway known as the Ferro Carril de Pernambuco, and has obtained a controlling interest in the Brazilian Street Railway Company, Limited, by an exchange of shares and debentures. In September, 1913, the company purchased the undertaking, with its rights and privileges, owned by Messrs. Fielden Bros., of Manchester, and subsequently applied for and obtained a revised concession for public and private lighting, both electrical and gas, and the supply of electrical power. The authorised capital is £1,250,000 in shares of £1, £400,000 being 6 per cent. cumulative preference, ranking also for priority as regards capital, and £850,000 ordinary, and all the preference and £812,829 of the ordinary have been issued and are fully paid. There are also 5 per cent. debentures of £100 each for £822,960, part of a total authorised of £1,250,000, with interest payable January 1 and July 1, and the principal repayable by January 1, 1953, at par, by means of a cumulative sinking fund of 1 per cent. per annum, commencing on January 1, 1916, to be applied by annual drawings, or by purchase when under par ; further debentures for £200,000 are to be issued to the contractors "on or before completion." At December 31, 1914, there was a loan the amount of which was not stated separately in the balance sheet, but as collateral security for which the company had undertaken to issue, if called upon, debentures to the value of £150,000.

The last accounts, which were for the six months to December 31, 1914, were submitted in May, 1915, but in future the accounts are to be made up annually to the end of the year. The contract for the electrification of the tramway lines and their equipment and the construction of the power house

provided that as from December 31, 1914, the company would be responsible for interest upon the debentures and dividend upon the preference shares. The work of converting the remaining section of mule tramway to electric traction is practically finished, and the completion of the power house is in hand. For the half-year to December 31, 1914, the working of the gas and electric light departments, and of the Olinda Street Railway, resulted in a profit of £10,227, and after providing for interest on the loan and on £222,960 of debentures there was a surplus of £3,057, increasing a credit balance brought down to £13,646. Voting power, one vote for each share. Director's qualification, shares of either class to the nominal value of £1,000, except first directors, named above. Transfer form, common; fee, 2s. 6d. Peruvian Corporation, Limited.—*Directors:* G. A. Davis (Chairman), O. R. H. Bury (Managing Director), W. S. Eyre, A. Naylor, J. Kulp (Paris), H. M. Read, H. Van Kempen (Amsterdam) and T. E. Webb. *Secretary:* H. D. Yates. *Office:* 43-6, Threadneedle Street, E.C.—This company was registered March 20, 1890, to take up concessions granted by the Peruvian government to Peruvian bondholders under the contract for the settlement of the Peruvian external debt. Prior to such contract being concluded, the whole of the outstanding Peruvian bonds of 1870 and 1872 had been registered with the Peruvian Bondholders' Committee, and clause 1 of the said contract, in the following terms, releases the government of Peru from all further claims by the bondholders: "The committee of bondholders, in representation of the latter, releases the government of Peru fully, absolutely and irrevocably from all responsibility for the loans of 1870 and 1872, so that said responsibility cannot be hereafter revived against Peru, either in whole or in part, for any cause or motive." Further, each bond had to be stamped as follows: "Peru remains absolutely, completely and irrevocably released from all responsibility for the capital and interest represented by this bond, in accordance with the contract approved by the congress of Peru on October 25, 1889." The Peruvian government gave to the bondholders a cash annuity; the whole of the state railways; guano concessions; and land grants. The cash annuity was £80,000, to run for a period of thirty years, commencing in 1893. It was subsequently reduced to £60,000, in consideration of exemption of the corporation from taxes, and as so reduced it was paid to June, 1893, subsequent to which date default took place. After lengthy negotiations between the corporation and the government a settlement of all questions in dispute was arrived at in June, 1907. Under this agreement the government is to pay to the corporation thirty annuities, each of £80,000, in monthly instalments commencing with July, 1907, the sugar tax being specifically allocated as security, while the government has undertaken that the sugar tax shall not be altered without the consent of the corporation; which on its side is to pay taxes quarterly at the rate of £12,000 per annum for the first ten years, £15,000 per annum for the second ten years, and £20,000 per annum for the third ten years, and thereafter at the same rate as is paid by other railways in Peru. The total length of the railways operated by the corporation is 1,336 miles; the extensions to Huancayo and Cuzco were inaugurated in September, 1908 (the Guaqui-La Paz railway—60 miles—has been purchased outright by the corporation, and consequently is not affected by the agreement of July, 1907, or the conditions of the railways in Peru). The railways referred to were ceded for a term of sixty-six years from January, 1890, but the 1907 agreement extended the lease by 17 years (to 1973), and at the expiration of that period the lines are to revert to the government, which, during the period of 17 years by which the lease was extended under the 1907 agreement, is to receive 50 per cent. of the net profits of the railways, after deducting the service of the bonds the corporation may have issued, not exceeding in the whole £6,000,000. The government is to provide the necessary lands, being the property of the state, required for the railways and buildings. The tariffs have been arranged with the government, and it is provided that "the silver sol shall be received in payment for freights and passages at the current market rate of exchange, except when this exchange shall fall below thirty-four pence. In such case the tariffs shall be raised in proportion, until they reach the said exchange of thirty-four pence"; and to meet the fall in the value of silver, tariffs have been raised, wherever possible, to the maximum. All articles required for the construction and repair of the railways (as well as machinery and tramways for working the guano) are to be imported into Peru free of government duties. The right is given to work the existing telegraph lines, or those which may be hereafter established along the

railways, with the same conditions in regard to the telephone. By subsequent contracts the corporation acquired the right to construct and own in perpetuity a railway from a station on one of the state lines to reach any one of the navigable rivers of the interior of Peru (a distance, depending on direction, of from 153 to 300 miles), and in connection with this projected railway the government was to give the necessary lands and a subsidy of 6,000 hectares (about 15,000 acres) of land for each kilometre of finished railway, the location of this land subsidy to be settled by agreement between the government and the concessionaires. The last-named railway concession is perpetual, and is exclusive for twenty-five years, and all the material necessary may be imported free of duty. Surveys were made in accordance with the concession, but no construction works were undertaken in consequence mainly of non-payment by the Peruvian government of the annuity under the old agreement. A grant of 500,000 hectares of land in the Perené Valley having been made by the Peruvian government, the corporation started colonisation, and has improved existing roadways. As to the guano concession, the government ceded to the corporation all guano existing in the territory of Peru up to the amount of 3,000,000 English tons, as to 1,000,000 tons dependent upon building to Cuzco. This concession lapsed as regards the third million tons, the corporation only having guano up to 2,000,000 tons. "The government cannot export guano, nor sell it so that others may export it, until the bondholders shall have finished taking out the amount ceded to them, but the right of using such guano as might be required for Peruvian agriculture was reserved. Some 1,290,000 tons have already been shipped, and considerable quantities are known still to exist, but it is difficult to give any reliable estimate of them." The authorised share capital is £16,500,000 in shares of £1 (since converted into stock), £7,500,000 being 4 per cent. cumulative preference, with a priority as to capital, and the balance ordinary. The shares were issued against bonds of the Peruvian debts of 1870 and 1872, each £100 of 1870 bonds receiving £24 of preference and £30 of ordinary of the new company, and each £100 bonds of the 1872 loan receiving £20 of preference and £25 ordinary shares of the new company. The following issues have been made:—

£9,000,000 Ordinary stock.

£7,500,000 Four per cent. preference stock, cumulative.

£5,400,000 Six per cent. first mortgage bonds, to bearer of £50, £100 and £500 each. Of this amount £1,500,000 was issued in London and Amsterdam in April, 1890—in London by Messrs. Antony Gibbs and Sons, 22, Bishopsgate, E.C., at 91 per cent.; £1,100,000 was sold to Messrs. Gibbs—£500,000 in September, 1891, £600,000 in June, 1892; £1,700,000 was issued in April, 1908, at 96 per cent.; and the balance has been issued in discharge of certain obligations on one of the railways, in exchange for bonds of the National Pisco to Yca Railway loan, and in payment of obligations on other of the railways, and for repairs of the existing railways, construction of extensions, and renewal of rolling stock. Interest is payable April 1 and October 1, by Messrs. Coutts and Co., 15, Lombard Street, E.C., and the principal was to be redeemed by annual drawings (in January) at 105 per cent., by a cumulative sinking fund of 1 per cent. per annum, commencing January 1, 1896, or earlier, at the option of the company (see below). The bonds may be registered as to principal only, at the option of the holder, and registered bonds may be again made payable to bearer, the fee being 2s. 6d. per transaction either way. The total authorised is £6,000,000. Interest on the bonds was duly paid to October, 1895, but, owing partly to the default of the Peruvian government in payment of the annuity, the debenture-holders decided in March, 1896, that the coupon due in April, 1896, should be paid at the rate of 2 per cent. per annum; that coupons due October, 1896, to April, 1901, both inclusive, should be paid at the rate of 3 per cent. per annum; and that coupons due thereafter should be paid at the rate of 4 per cent. per annum—the corporation, however, not to pay any dividends on either preference or ordinary capital for any year ending June 30 without first providing such a sum as will make up the interest on the debentures to 5 per cent. per annum for that year, and after payment of such 5 per cent., the corporation may pay ¼ per cent. dividend on the preference stock, while no dividend in excess of ¼ per cent. on the preference stock is to be paid unless interest at 6 per cent. be first paid on the debentures for that financial year. For each of the twelve years to 1913-14 an extra 2 per cent. was paid on the April 1 following, making 6 per cent. for each year. The sinking fund for the debentures, after being suspended for a considerable time, was resumed in 1910; amount outstanding, £5,111,750.

The accounts are made up annually to June 30, and submitted in December. For the twelve years to 1913-14 the debentures got 6 per cent. per annum, and for 1902-3 ¾ per cent. was paid on the preference stock; for 1903-4 1¼; for 1904-5, 1905-6, 1906-7 and 1907-8 1½ each year; for 1908-9, 1; for 1909-10, 1¼; for 1910-11, 2; for 1911-12 and 1912-13, 2¼; and for 1913-14, 1, leaving arrears at June 30, 1914, at 74⅜ per cent. In February, 1915, troubles arose with the Peruvian government in regard to the taking of guano, but in May, 1915, shipments were resumed. Reserve fund, £700,000 (invested in various businesses of the corporation); lake steamers and fire insurance accounts, £46,549; carried forward, £90,171, including £60,382 brought down. The annuity payable by the Peruvian government under the 1907 settlement has always been duly met. Voting power, one vote for every £1 of ordinary or preference capital. Pillsbury-Washburn Flour Mills Company, Limited.—*Directors:* C. Lock (Chairman), S. T. Klein and A. Shepherd. *Secretary:* H. K. Davis. *Office:* Winchester House, E.C.—The company was registered October 28, 1889, to take over various flour mills, businesses, and water power properties, in the state of Minnesota, U.S., the mills being vested in a New Jersey corporation formed for that purpose, and the water power properties being left in the hands of the two companies who owned the same under federal charters granted by the United States government. The whole of the shares of these three companies were transferred to the English company. In August, 1908, the company was unable to meet its debts as they became due, and receivers were appointed by the Federal Court. A scheme of reorganisation was adopted early in 1909, and has since been carried out, under which the unsecured creditors (amounting to about $5,200,000) have been settled with, partly in cash (realised by the sale of certain liquid assets), and as to the balance, by the issue of $3,000,000 of 20-year 5 per cent. second mortgage bonds. Under this scheme, the mills, trade marks and goodwill have been leased to an operating company, formed in the United States, with a capital of $2,000,000, the operating company paying, by way of fixed rent therefor, a sum of $100,000 per annum, together with one-half of any profits in excess of $150,000 per annum earned by it. The water-power rents receivable by the English company, in addition to the rent for the milling properties, amount to about $400,000 per annum. Under the scheme, the security for the first mortgage debentures was improved and strengthened, and both first and second mortgage debentures are now successively secured by a transfer of the shares of the water power companies and of the New Jersey corporation, to the First Trust and Savings Bank, of Chicago, as trustee, and by an assignment to the same trustee of the benefit of the lease to the operating company, as well as by the bonds and mortgages upon the properties of the New Jersey corporation and the two water power companies charged by the original trust deed, the amount of such bonds and mortgages in the case of the New Jersey corporation being $5,000,000, and in the case of each of the water power companies, $1,500,000. The second mortgage debentures are entitled to the benefit of a sinking fund of $30,000 per annum out of the fixed revenues of the English company, and of a further $30,000 per annum out of any share of profits which may accrue to it under the lease to the operating company.

The authorised share capital is £1,000,000 in shares of £10, half ordinary and half 8 per cent. cumulative preference, the latter having also a priority as to capital, and the whole amount has been subscribed and called up, of which 2,748 preference and 2,640 ordinary shares have been surrendered under agreement in July, 1911, and are now held by trustees for the company. There are also 6 per cent. first mortgage debentures of £100 each for £875,000 (part of £900,000 authorised), secured as a first charge on the company's water power, with interest payable May 1 and November 1 by Glyn, Mills, Currie and Co., 67, Lombard Street, E.C., and the principal repayable, at the option of the company (now) at any time on six months' notice, at 110 per cent. (of the total of £875,000 of debentures £160,000 was issued to the vendors, £475,000 was issued publicly in 1889 at par, £140,000 publicly in May, 1897, at 96 per cent., and £43,000 privately, late in 1907). Second mortgage 5 per cent. bonds of $50, $100, $500 and $1,000 each were issued in 1909 as stated above for $3,000,000 (£618,556), with interest payable February 8 and August 8, and the principal repayable by a minimum sinking fund of 1 per cent. per annum, as stated above, this fund to be applied by purchase when the bonds are obtainable under par, or by drawings at or above par; the

first appropriation of the sinking fund took place in 1910, and has so far been applied by purchase, while the amount of the bonds outstanding is now £579,515. There is also a loan of £12,000 (as security for which £25,000 of first mortgage debentures have been lodged).

The accounts are made up annually to August 31, and those to August, 1914, were submitted in January, 1915. For the six years to 1905-6 the preference dividend was paid, but nothing on the ordinary; and no dividend has since been paid on either class of shares, although the service of the debentures has been met to date. In respect of the year to August 31, 1914, the company's revenue, after deducting the amount applied to depreciation reserve, amounted to £96,193, which sufficed to pay all management charges, interest on the 6 per cent. first mortgage debentures, interest and sinking fund for the 5 per cent. second mortgage bonds, and £5,712 towards the contingent sinking fund of the last-named issue, leaving a profit of £384, thus reducing the debit balance brought forward to £824,270. This deficiency includes loss in past years on "B" notes irregularly issued, and not disclosed in the books of the company, in connection with unauthorised wheat speculations.

$6,500,000	Shares of $100, fully paid.
$4,349,900	Five per cent. first mortgage thirty-year gold bonds, some of which were sold privately in London and Canada in 1906, at 90 per cent.; the bonds form part of a total authorised of $6,000,000, have interest payable January 1 and July 1 (see below), while the principal is to be repaid January 1, 1942 (see below), from a sinking fund of 1 per cent. per annum, which commenced on January 1, 1912, but has been temporarily suspended (as stated below), to be applied in redeeming the bonds by annual drawings at 105 per

cent., or by purchase at or below that price, and the company has (now) the power to redeem the bonds at 105 per cent. at any time, while they are secured, subject to the prior lien bonds, mentioned below, on the entire undertaking of the company. All payments have been made in London—by the Bank of Montreal, 47, Threadneedle Street, E.C.—Montreal or New York, or by the bank's agents in Basle, Berlin and Brussels.

Interest due on these bonds in July, 1915, was not met, and in July, 1915, the holders agreed that for the five years from January 1, 1915, interest should be payable only if and when and to the extent that there are net earnings available ; any interest not paid in cash at the expiration of such five years to be met by the issue at par of 5 per cent. income warrants, carrying non-cumulative interest at 5 per cent. per annum, payable only out of profits, and redeemable by the application of all subsequent net earnings to be used in the purchase of warrants by tender, or in the redemption of warrants by drawings at par. Bondholders, moreover, agreed to cancel the operation of the sinking fund for five years from January 1, 1915, and to extend the date of maturity from January 1, 1937, to January 1, 1942.

$3,000,000 (£616,438) Five per cent. prior lien fifty-year gold bonds of $100 (£20 10s. 11d.), $500 (£102 14s. 10d.) and $1,000 (£205 9s. 9d.) each, issued in December, 1911, through the London City and Midland Bank, Limited, 5, Threadneedle Street, E.C., at 95 per cent., for the purpose chiefly of constructing a 17,000 h.p. power plant at the Tuxpango Falls. The bonds form part of a total authorised of $6,000,000 (£1,232,876), have coupons payable January 1 and July 1, and the principal falls due July 1, 1961, but, commencing with the year 1921, are also repayable by means of a cumulative sinking fund of 1 per cent. per annum, applicable annually by purchase in the market at or below par, or by drawings at par, while the company retains the option to redeem the whole amount at par on July 1, 1921, or on any interest date thereafter, on three months' notice. The bonds are secured by a trust deed as a first fixed and specific mortgage over the entire undertaking of the company ; they are to bearer, but may be registered as to principal at the office of the trustees in Toronto. All payments are made in London in sterling, at the London City and Midland Bank, Limited, as above, or in Toronto, at the fixed exchange of $4.86\frac{2}{3}$ to the £.

Interest on the prior lien bonds has been met to date.

The accounts are made up annually to December 31, and usually submitted in Toronto, Canada, about March, and at the same time a meeting is held in London ; the accounts for 1913 were presented in August, 1914. The Anglo-Mexican Electric Company, Limited, holds a controlling interest in this company. The Tuxpango power plant was put into action on October 21, 1913, and power was delivered at Puebla three days later, while the transmission line to Vera Cruz, which had been delayed by the American occupation, was completed, and power delivered to that city in November, 1914. It is announced that the only damage suffered by this company's property from the political disturbances in Mexico has been the continued interruption of one transmission line which traverses a mountainous district, involving a temporary monthly loss in gross revenue of $15,000 (Mexican). After meeting fixed charges there was an available balance at December 31, 1907, of £6,755, which was carried forward ; in 1908, after meeting fixed charges, the credit balance brought down was converted into a debit of £5,657, which in 1909 was increased to £6,573, and in 1910 reduced to £1,132, while in 1911 the debit balance was converted into a credit of £6,197, which in 1912 was increased to £6,550, while in 1913 this was converted into a debit of £11,800. Interest on the prior lien bonds has been met to date in cash, but, as stated above, holders of the first mortgage bonds agreed in July, 1915, that for the five years from January 1, 1915, interest on such bonds should only be paid to the extent that there are net earnings available. The company is quoted in the official list. Latest price of prior lien bonds, 50.

Haggett. *Office:* 228, Dashwood House, E.C.—The company was established in 1862 to acquire and carry out a concession from the Brazilian government for certain public works at Rio. Under this concession (which expires in 1947, when the works revert to the government without payment) the government guarantees to the company the revenue (from drainage, &c., service) to which the company is entitled, and further grants certain monopolies. In January, 1900, a new contract was concluded with the government by which the government undertakes to pay to the company the amount stipulated in the original concession (60 milreis for each house drained) at a fixed exchange of 19d. to the milreis. The company on its part undertook to complete within three years the works of the new extensions, which were suspended for want of

funds in 1896; and the company further undertook to improve its system gradually so as to make it conform to the ideas of the government, all other clauses in the concession not affected to remain in force. In 1904 each share of £25 was divided into five, and the subscribed capital is now £1,192,775 in fully-paid shares of £5. There are also—£21,100 debentures of £100 each, issued in 1878, 1879 and 1880, bearing 5 per cent. interest, payable April 1 and October 1, and redeemable by thirty-five annual drawings in December (commencing a year after issue); £220,900 debentures of £100, issued in 1882, 1884, 1885, 1891 and 1893, bearing 5 per cent. interest, payable June 1 and December 1, and redeemable by thirty-five annual drawings in November, commencing in 1897; £132,900 debentures of £100, issued in April, 1901, at 94 per cent., bearing 5 per cent. interest, payable June 1 and December 1, and redeemable at par by twenty-eight annual drawings in November, commencing in 1904; and £230,500 debentures of £100, issued in February, 1908, at 96 per cent., bearing 5 per cent. interest, payable June 1 and December 1, and redeemable on or before December, 1931, by annual drawings (in November) at par, commencing in 1909, or by purchase in the market at or below par. The directors, in their report for 1911, stated as follows:—"As inquiries are frequently being made as to what is being done with regard to the amortisation of the share capital of the company, your directors take this opportunity of informing the shareholders that the amount set aside annually for the redemption of the debentures is, in the opinion of the board and the auditor, more than sufficient to amortise the whole of the capital expenditure by the end of the concession."

The accounts are made up annually to December 31, and submitted in March or April. For 1904 7 per cent. was paid; for each of the nine years to 1913, 5; and for 1914, 2½, the reduction being due to the low rate of exchange ruling (free of income tax). The company has acquired concessions granted by the state of Rio de Janeiro in perpetuity for the construction of hydraulic works and transmission lines, and the sale of electric energy throughout the state of Rio de Janeiro, and a concession from the municipality of the federal district giving the right to furnish electrical energy until 1990. The company has also acquired, with the exception of a very few shares, the entire capital stock of five local tramway companies, and about 80 per cent. of the other local tramway, thus controlling the entire tramway business of the city, with the exception of a small line in which the company owns a large percentage of the stock. The tramways are operated under a concession which extends to 1970, with exclusive rights until 1940; the lines were gradually electrified, the last section being finished in March, 1910. The company has also acquired all the share capital of the Rio Telephone Company, nearly all the share capital and outstanding debentures of the Rio Gas Company, and has a controlling interest in

the Interurban Telephone Company. The Telephone Company holds a concession exclusive until 1929, while the Gas Company has a concession with monopoly for both public and private gas lighting of the city of Rio and federal district, and for public lighting by electricity until September 15, 1945, and for private lighting by electricity in perpetuity. The company issued, under the scheme of reconstruction, £298,973 6 per cent. debentures of £5, £10, £25, £50 and £100 each, with interest (cumulative) payable May 1 and November 1, while the holders of the debentures are to have the option to convert their holdings into shares for a like nominal amount. The principal of the debentures was to be redeemed from a cumulative sinking fund of 5 per cent. per annum, accruing as from May 1, 1914 (up to which date foreclosure rights were suspended), the sinking fund to be applied to annual drawings at par, or by purchase, the company having from May 1, 1914, to provide a sum of £33,000 per annum for interest and sinking fund, and the company reserved the right to accelerate the rate of redemption or purchase of the debentures, which at any time may be redeemed as regards the whole issue at par and accrued interest; amount outstanding £277,048. In 1915, however, the debenture holders agreed to postpone the commencement of the sinking fund to the May 1 or November 1 (whichever shall be the earlier date) next succeeding the close of a period of six calendar months after the conclusion of peace, or after the expiry of the Courts (Emergency Powers) Act, 1914, whichever shall happen first, and so that, if the first payment under the sinking fund shall become due on November 1, subsequent payments in each year shall be made on November 1 instead of May 1; and at the same time the debenture holders agreed to give power to the trustees to allow the company three calendar months' grace within which to pay any half-year's interest falling due on or after November 1, 1915, provided that application for any postponement shall be made by the company to the trustees not later than three weeks prior to the due date for such payment. There are also profit-sharing notes for £187,500, which do not carry interest, but (after all the debentures have been redeemed or converted into shares) are to be redeemed by drawings at par, or by purchase at a price under par, from one-fifth of the net profits of the company after payment of all outgoings chargeable to revenue and making provision for depreciation and reserves.

In respect of the year to December 31, 1913, there was a trading profit of £90,664, and the total income was £93,241, and after providing for one year's debenture interest (see below), &c., there was a net profit of £68,796, of which £52,171 was applied in writing off underwriting commission, other preliminary expenses, and expenses of transferring properties, the balance of £16,624 being carried to reserve for depreciation, renewals, and general purposes. Insurance fund, £9,736. Interest on the debentures due November 1, 1914, was duly paid, and that due May 1, 1915, was met after a trifling delay; in May, 1915, the debenture holders agreed to the postponement of the sinking fund as stated above, and in November, 1915, to the postponement of the debenture interest due November 1, until February 1, 1916. Shell Transport and Trading Company, Limited.—*Directors:* Sir M. Samuel, Bart. (Chairman and a Managing Director), H. N. Benjamin, A. V. D. Best, R. J. Black, R. W. Cohen, H. W. A. Deterding, Sir R. McLeod, K.C.B., W. F. Mitchell (a Managing Director), S. Samuel, M.P. (a Managing Director), W. H. Samuel (a Managing Director) and A. J. C. Stuart, the four managing directors representing the company on the boards of the Anglo-Saxon and Bataafsche Companies. *Secretary:* E. A. Smith-Rewse. *Office:* 25-7, Bishopsgate, E.C.—The company was registered October 17, 1897, to carry on the business of transporting in bulk, illuminating, fuel, and gas oils and other petroleum products, and had interests in oil-producing territories in Dutch Borneo, besides shares in kindred companies. As from January 1, 1907, amalgamation was effected with the Royal Dutch Petroleum Company. The scheme involved the formation of two new companies—the Bataafsche Petroleum Maatschappij, registered in Holland, whose paid-up capital is 140,000,000 florins, and the Anglo-Saxon Petroleum Company, Limited, registered in 1907 in England, whose paid-up capital is £8,000,000—to which have been transferred the assets and undertakings of the amalgamating companies, the respective interests of the Royal Dutch Company and the Shell Company in the combined undertakings having been fixed at 60 per cent. and 40 per cent., although as a consideration for giving the Royal Dutch Company the practical control of the business it was expressly provided that for a period of ten years from January 1, 1907, the first £375,000 of profits of the combined companies available for dividend in each year should be dealt with as follows:—(1) The first £50,000 to go to the Shell Company; (2) then £12,000 to the Royal Dutch Company; (3) then £100,000 to the Shell Company; and (4) then £213,000 to the Royal Dutch Company, making a total of 60 per cent. to the Royal Dutch Company and 40 per cent. to the Shell Company. Any variation in these proportions by reason of these special appropriations in any year or years is to be made up out of the surplus profits of subsequent years before any further dividend beyond the £375,000 is paid. In the event of the liquidation of the new companies, or their sale as going concerns at any time before January 1, 1932, notwithstanding that the shares are held in different proportions, the net proceeds up to an amount of £9,000,000 are to be divided equally between the Royal Dutch Company and the Shell Company, and the balance only is to be divided in the proportion of the shares held by each company. In accordance with the provisions of the scheme of amalgamation, the Royal Dutch Company purchased, as on January 1, 1907, 500,000 ordinary shares of £1 each from shareholders in the Shell Company at 30s. per share, ex the 5 per cent. dividend for 1906, the Royal Dutch Company undertaking not to part with any of these shares without the consent of the board of the Shell Company, but, as a result of various transactions, the holding of the Royal Dutch Company has since, with the consent of the board of the Shell

Company, been reduced to about half of the original amount. The company does not own any oil properties itself, but besides its interests in the Anglo-Saxon Petroleum Company, Limited, and the Bataafsche Petroleum Maatschappij, it held on December 31, 1914, investments in British securities, foreign and colonial government, railway and municipal stocks, &c., of the market value of £1,052,295.

Reserve funds (including premiums on shares issued in 1913), £3,900,000; carried forward, £436,795. Up to the present it has been the company's practice to pay interim dividends of 5 per cent. each in July and January, in anticipation of the annual meeting, with the final dividend in July, but the interim dividend in July is not to be continued, while in January, 1916, the whole interim dividend for 1915 will be paid, and the final dividend in July, 1916, and this practice will be continued. The preference dividend is paid April 1 and October 1.

The debentures form part of a total authorised of £1,000,000, are of £100 and £20 each to bearer, have coupons payable February 1 and August 1, free of English income tax, and the principal is repayable within 25 years by annual drawings (in January at 105 per cent.), commencing in 1913. Renard (Paris) and A. Ticier (Paris). *Secretary:* B. Catling. *Office:* Dashwood House, E.C.—The company was registered February 23, 1910, mainly to acquire a tramway of about 25 kilometres at Curityba, Parana, Brazil, and to convert the same to electric traction, and has also acquired a concession for the supply of electric light and power in the city of Curityba, water power rights, &c. "The company is the sole owner of the tramway, electric lighting and power concessions, which are not subject to any onerous conditions. No option has been granted to the local authorities to purchase the tramway undertaking," but "the state of Parana has the right to purchase the electric lighting undertaking on payment of (1) the value of the undertaking (viz., cost price plus cost of works executed minus annual depreciation); (2) 20 per cent. of average profits for the previous three years, and also 20 per cent. of progressive increase in profits from one year to another of such three years multiplied by the number of complete years to elapse before the termination of concession." The authorised capital is £300,000 in shares of £4, all of which has been issued and called up, 71,743 shares having been issued credited as fully paid. There are also—5 per cent. debentures, first series, for £289,160, part of £300,000 authorised, with interest payable April 1 and October 1 (last payment April 1, 1914), free of income tax, and the principal repayable October 1, 1968, being secured by a first charge on the tramway undertaking; and £372,800 5 per cent. debentures, second series, part of £500,000 authorised, with interest payable April 1 and October 1 (last payment April 1, 1914) free of income tax, and the principal repayable in 1968, being secured by a first charge on the electric lighting undertaking and by a second charge on the tramway undertaking. The unissued debentures of both classes have been deposited as collateral.

At October 1, 1914, apart from the debentures as above, there was an amount of £130,283 due to secured creditors, £12,899 owing to unsecured creditors elsewhere than in Brazil, and £4,559 owing to unsecured creditors in Brazil. Of the sum named of £130,283 the bulk was in respect of bills drawn by the company and negotiated by the lenders. A scheme of arrangement was sanctioned at meetings of the share and debenture holders in October, 1915, and now awaits the sanction of the Court. Under this scheme, *inter alia*, the lenders agreed to renew the above bills for periods of three months as from October 1, 1914, up to not later than April 1, 1919; the lenders retain an option until April 1, 1919, to purchase the debentures of both series originally deposited as collateral, and are also granted a preferential right on equal terms for the same period on the whole or part of an issue of £240,000 prior lien debentures, which the company is authorised to make under the scheme. The lenders are in addition granted a preferential right, exercisable during a like period, to take up all, or part, of any preference shares the company may issue at the price which the same may from time to time be offered for subscription. Other creditors are arranged with under the scheme, and the holders of the two series of debentures are to forego absolutely the payment of the coupons due October 1, 1914, and April 1 and October 1, 1915, while thereafter the net earnings derived from the working of the tramways undertaking are to be applied in the first instance to the payment of interest at not exceeding 6 per cent. per annum on the first series of debentures, and the net earnings from the electric undertaking are to be applied in the first instance to the payment of interest at not exceeding 6 per cent. per annum on the second series of debentures, the first payment for a half-year to be made on both classes on April 1, 1916, from one-half of the net earnings of the eighteen months

ending September 30, 1915, while should there be in any year a loss on the working of either of the undertakings, no interest for such year is to be payable on either class of debentures until this loss is made good out of the net earnings of the other undertaking. Further, in any year after 1916-17 in which the debenture holders of either series shall have received 6 per cent. per annum out of the net earnings of the undertaking on which such series is primarily secured there is to be set aside, before any part of such net earnings is appropriated to the payment of interest, a sum equal to 15 per cent. of the balance remaining of such net earnings for the redemption of the debentures secured on such undertaking. The amortisation tables endorsed on the debentures are suspended.

The accounts are made up annually to March 31, and those for 1913-14 were submitted in July, 1915. In December, 1912, the contractor found himself unable to carry out his engagements, and was compelled to come to an arrangement with his creditors. In consequence, the company, as on January 1, 1913, took over the workings of the tramways and electric lighting system, and regained possession of the whole of the property, which had previously been in the hands of the contractor under his agreement; the company also undertook to complete for account of the contractor the works forming the objects of the contracts entered into with him. Since April 1, 1913, the undertaking has been carried on for account of the company. All the works have been completed, and the tramways have been operated by electricity since January, 1913, as regards passenger traffic, and practically the whole of the goods traffic. The question of the erection of the hydro-electric works is still under consideration. The final settlement of accounts with the contractor forms part of the scheme of arrangement, as above. The receipts from the tramway undertaking for the year 1913-14 were 420,845 milreis, and for 1914-15, 408,073 milreis. The receipts from the electric light undertakings for the year 1913-14 were 718,447 milreis, and for 1914-15, 773,302 milreis. Interest on both the first and second debentures has been paid to April 1, 1914, but that due October 1, 1914, and April 1 and October 1, 1915, was not met. Voting power, one vote for every share. The preferred shares have also priority as regards capital, and after paying to the deferred ordinary shares a sum equal to the total amount so paid to the preferred shares, surplus assets remaining are to be divided in the proportion of two-thirds to the preferred and one-third to the deferred ordinary shareholders. The works at Rainham have been completed, and have been taken over by a government department—whether permanently or temporarily cannot, however, be stated. The works at Rainham were intended for the manufacture of acetone, fusel oil and synthetic rubber and for large scale experimental operations. To June 30, 1914, development and experimental expenditure totalled £40,102, while preliminary expenses figured as an asset for £12,492. Director's qualification, shares of the nominal value of £100. Transfer form, common; fee, 2s. 6d. Telegraphic address, Multiprene, Finsquare, London. of the company, and the bondholders on the other side, it was proposed that the company should be reconstructed, and a new company formed to acquire the assets, the British bondholders to be directly represented on the board of the new company. Subsequently, at a meeting of bondholders and shareholders held at Montreal, in August, 1914, a scheme of reconstruction, as drawn up by the committee of bondholders, was approved, whereby the old bonds were exchangeable pro rata for 6 per cent. non-cumulative preferred shares, and the common shares at the rate of $1 new for every $10 old. The preferred shares also carry with them fractional preferred certificates for the coupons in default on the old bonds. The committee of bondholders took power to issue $750,000 first mortgage 6 per cent. 25-year bonds, but it is only intended to use these bonds as pledge should the board require to raise further funds for the purpose of paying the timber licences."

In 1913 the then existing preference shares of £5 were subdivided into shares of £1, 12s. per preference share and 17s. 6d. per ordinary share, each of £1, was written off as lost, and the whole of the unissued shares cancelled ; the two classes of capital were then consolidated into B preference stock, and all arrears of preference dividend to December 31, 1912 (£74,999) cancelled. Additional Notices, &c.

Bolivar Railway Company, Limited.—The accounts for the year ended June 30, 1915, showed a profit of £38,681, and after meeting interest charges and placing £7,000 to reserve for depreciation, repairs and maintenance, there remained an available balance of £8,837. This sum was sufficient to pay a dividend of 3 per cent. on the preference shares, but the cash was not immediately available, owing to the money having been used upon the branch railway to San Felipe, the construction of which had, at the beginning of the war, reached a stage where it was impossible to stop without incurring serious loss. This 3 per cent. dividend, together with 5 per cent. in respect of the year 1913-14, the directors proposed to satisfy by the issue to the preference shareholders of an equivalent amount of 6 per cent. debenture stock at par, but the sanction of the Treasury could not be obtained to the issue. In view of this decision and the desire of the directors to give some tangible form to the company's indebtedness to the preference shareholders a scheme was to be submitted to the meeting on November 30, 1915, under which holders were to receive a scrip certificate for 8 per cent. on their holdings in satisfaction of the 8 per cent. dividend due to them, the scrip to bear interest at 6 per cent. from December 1, 1915, and to be exchanged for a like amount of 6 per cent. debenture stock when such an issue is possible, while if no exchange is effected by December 31, 1918, the amount represented by the scrip certificates is to become a debt due from the company, and payable so soon as circumstances shall, in the opinion of the directors, admit of such payment being made.

Canada.—In November, 1915, the Dominion government offered, in Canada, a loan for $50,000,000 in 5 per cent. bonds, at the price of 97½ per cent., payable 10 per cent. on application, 7½ per cent. on January 3, 1916, and 20 per cent. each time on February 1, March 1, April 1 and May 1. Interest is payable June 1 and December 1 (a full 2½ per cent. on June 1, 1916), and the bonds fall due December 1, 1925, all payments to be made in the principal cities of Canada. The bonds are to be in denominations of $100, $500 and $1,000, and amounts of $1,000, $5,000 and multiples of $5,000 will be registerable in the names of the holders. The loan is free of Canadian taxes, and is to be accepted as cash in case of any future issues.

Cities Service Company.—In November, 1915, it was announced that the directors had sold $5,000,000 of preferred capital and $2,500,000 of common shares, the proceeds to be devoted to retiring the existing floating indebtedness, and to provide working cash capital. Holders of the preferred shares of the company are to receive on January 1, 1916, in respect of the 9 per cent. dividend which will then be outstanding, an equivalent amount of 5 per cent. convertible debentures, with power to convert such debentures at any time on the basis of $100 of preferred shares and $25 of common shares for each $100 of debentures, while the directors have decided to set aside for the common shareholders 9 per cent. of 5 per cent. debentures, to be distributed when the claims of the holders of the preferred capital have been met. It is further announced that the company will resume, on February 1, 1916, payment in cash of regular monthly dividends on the 6 per cent. preferred shares.

Delaware and Hudson Company.—The shareholders on September 30, 1915, authorised the issue of $14,451,000 twenty-year 5 per cent. bonds of $1,000, which were offered to shareholders pro rata, payable $250 per bond on or before October 6, 1915, or optionally in full at that time ($1,000.70) and $760.70 on or before January 12, 1916. The bonds may at the option of the holders at any time after October 1, 1917, up to October 1, 1927, be converted into fully-paid shares at the rate of $1,500 bonds for ten shares (with an adjustment of interest and dividend). The entire issue, but not a part, may be called for redemption on October 1, 1922, or on any interest day thereafter, on ninety days' notice, at 105 and interest, but if so called during the conversion period the bonds may be converted up to thirty days prior to such call day.

Erinoid, Limited.—*Directors:* A. Binnie (Chairman), J. S. Beauford, F. W. Beck, P. M. Bright and W. G. Waldron. *Secretary:* A. E. Parker. *Office:* 58, Coleman Street, E.C.—The company was registered November 12, 1915, in reconstruction of Syrolit, Limited, which was registered April 12, 1911, to acquire the British patent, and options over certain foreign and colonial patents, for an invention of a plastic material known as Syrolit, a substance manufactured from separated milk. The authorised capital is £50,000 in shares of 5s., of which £33,104 10s. is to be issued fully paid to the shareholders in Syrolit, Limited, giving one share for every preference or ordinary share held in that company, and one share for every four deferred shares. Debentures to the amount of £3,000 are to be issued in exchange for existing debentures of like amount in the old company. Voting power, one vote for every share. Director's qualification, 100 shares. Transfer form, common; fee, 2s. 6d. Telegraphic address, Hosatus, London. Telephone number, 3214 London Wall.

France.—At the end of November, 1915, the Bank of England, with the consent and approval of His Majesty's Government, was authorised by the government of the French Republic to receive applications towards the National Defence Loan of France in the form of 5 per cent. rentes, both capital and interest being exempt from all taxes, present and future, of the republic. The price of issue was £3 4s. per 100 francs nominal capital, being the equivalent, at the exchange of 27.50 francs, of 88 francs, the price at which the loan was offered in Paris. The amount of £3 4s. was made payable 7s. on application, and 19s. each time on January 31, February 29 and March 31, 1916. The French government has undertaken that the issue shall not be redeemed prior to January 1, 1931, but has reserved the right to redeem the issue, in whole or in part, on or at any time after that date. The issue is to take the form of bonds to bearer, which will, if desired, be registered or inscribed in the "Grand Livre de la Dette Publique" at the Ministry of Finance in Paris, without payment of any

fee. An option was given to tender French government sterling Treasury Bills due January 16, 1916, in lieu of cash, the bills being accepted at the rate of £99 3s. 3d. for each £100 nominal of bills surrendered, and French government 3½ per cent. rentes (redeemable), and French government 3 per cent. rentes (irredeemable) could also be tendered in lieu of cash at the rate of £3 6s. 4d. cash for each 100 francs of the former, and £2 8s. cash for each 100 francs of the latter (ex coupon due January 1, 1916), but bills or rentes could only be tendered in lieu of cash where payment in full for an allotment of the new issue was made at the time of application, and, as regards the conversion of 3 per cent. rentes, to the extent of not more than one-third of the total amount payable in respect of an allotment of the new issue. No limit was placed on the amount of the new issue. The interest dates are February 16, May 16, August 16 and November 16, the first coupon for a full quarter's interest being payable February 16, 1916.

Imperial Continental Gas Association.—At the half-yearly general meeting held in November, 1915, it was announced that the association had sold the whole of its interest in the Frankfort-on-Main Gas Company to the Municipality of Frankfort, consisting of 7,705 shares of £50 each, for £762,795, equal to £99 per share, which includes—£11,887 compensation to the directors for loss of office; £38,525, being the dividend for the year 1915; and £140,000 the balance of a loan outstanding. The purchase money is to be paid in cash, "at the latest, six months after the ratification of the future peace between Germany and all the Great Powers which are at the time at war with the German Empire." The agreement has been entered into with the approval of the British Government.

Salvador.—Coupons due on the 6 per cent. bonds on August 15, 1915, were not met, and a meeting of the bondholders is called for December 3, 1915, to consider a scheme under which the coupons due from August 15, 1915, to August 15, 1919 (both inclusive) are to be funded into new 7 per cent. bonds, the income tax upon the half-yearly interest to be so funded up to, but not exceeding, 2s. 6d. in the £, being payable by the government of Salvador. The scheme further provides for the suspension of the provision of the annual cumulative amortisation fund for the 6 per cent. bonds until the funding bonds shall have been redeemed. The redemption of the new funding bonds is to commence in 1920. After August 15, 1919, the annual service of £85,000 for the 1908 loan is to be resumed, and this sum is to be applied in the first place to the payment of interest on the funding bonds, and then the interest on this 6 per cent. 1908 loan, while the balance is to be applied to the redemption of funding bonds, which will be completed by 1927, and the redemption of the 1908 loan is then to be resumed.

Samuel Allsopp and Sons, Limited.—Under the scheme of arrangement carried through in 1913 the rights of the 4½ per cent. debenture stock became enforceable on January 1, 1916, but a scheme (approved by the debenture stock holders' committee) was, in November, 1915, agreed to by the holders, under which this period is extended to December 31, 1920, or to such extended period as may from time to time be agreed upon, during which extended period the charge in favour of the holders is (except in the event of the winding up of the company) enforceable only by the trustees (and not by any individual holder or holders) by special resolution and on six months' notice to the company. Furthermore, the scheme provides for the distribution on January 1, 1916, in part payment of interest accrued up to December 31, 1915, of the net profits of the company for the year ended September 30, 1915, after providing for depreciation, reserves, and for the service of the prior lien debenture stock, &c., while against any balance of arrears in that year, or in any subsequent year, during the extended period, are to be issued "certificates of rights." These certificates will carry no interest, will be a floating charge on the property, and will be redeemed (by purchase in the market, by tender below par, or by drawings at par) in priority to any payment on the preference and ordinary stocks and funded income certificates, by the allocation of one-third of the net profits for the year to September 30, 1916, and subsequent years, and the remaining two-thirds in respect of that year and subsequent years are to be applied in providing the interest due on the debenture stock in respect of the year to December 31 following, any surplus over the amount required for one year's interest to be applied in further redeeming outstanding certificates. In submitting the scheme the board stated that the finances of the company were on a firm footing, and that they hoped "to be able to make a distribution to the 4½ per cent. debenture stockholders in cash on January 1, 1916, on account of arrears, of not less than 2½ per cent., leaving arrears of 11 per cent. to be satisfied by the allotment of certificates of rights."
